

VERTICAL LOCATING SLIDE BRACKET

ABSTRACT OF THE DISCLOSURE

5 A rack mount assembly for supporting a computer enclosure in a rack system having vertical apertured column flanges. The rack mount assembly includes an elongated mount adapter having mounting flanges disposed at each end thereof. Each mounting flange includes an alignment protrusion that is configured to fit in a corresponding aperture in one of the column flanges of the rack system.

10 The elongated mount adapter comprises, for example, a slide mechanism or a rack rail.
